Identity theft is happening on a massive scale. Systems of the IRS, large insurance carriers and major retailers, to name a few, are being hacked on what seems like a regular basis. You may have a home security system that alerts you if someone tries to burglarize your house. To help protect you and your family, you need an alert system for your identity. When LifeLock* detects suspicious activity within their network†, they notify members. ** LifeLock* detection is different than traditional credit monitoring and offers a set of features to help protect against identity theft. Just a few statistics to consider: there were **12.7 million victims** of identity theft in the U.S. in 2014; in 2014 the **cost was \$16 billion** - that number keeps growing; someone is a **victim** of identity theft **every second**; Identity theft was the **#1 reported consumer complaint** in 2013.

Choose the LifeLock* service that's right for you-complete & return the application inserted in the back.

LifeLock Benefit Elite™ theft protection uses innovative monitoring technology and alert tools to help proactively safeguard your credit and finances. LifeLock Ultimate Plus™ service provides LifeLock's most comprehensive identity theft protection available. See comparison below.
